RX-Rope

Unrivaled technology, the most secure rope

Ropecamp's engineers have created the safest, most attractive cabling in the playground industries. Using proprietary technology, they've infused the beautiful nylon cable coatings with UV protectants and flame retardant solutions in the extrusion process. They use these vibrant threads to weave a braid around 144 strands of galvanized steel to produce the play structure rope. This unique process keeps the ropes beautiful to see, soft to touch and stronger than any other cabling available.

The vibrant colors will immediately appeal to children of all ages, but the ropes will also feel just as good to touch. who provide services including products test and certificate. A class 8 UV Colorfastness rating keeps the ropes looking new and the special nylon formula and unique weaving of threads means that RX compound ropes are resistant to fading, wearing and fraying for years.

Available colors are Brown, Beige, Blue, Yellow, Red, Green, Black, Brown&Green, Blue&Red, Blue&Yellow, Black&Red Black&Neon green.

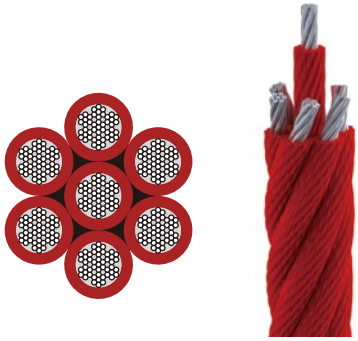

Customized design and prodution for Playgrounds equipment

Regarding all the RopeCamp products, we provide OEM service. We design beautiful net products to meet cutomer's requirements.

Flying Net

The flying net is a specialty climbing structure featuring a flexible center area surrounded by netting. As the center mat and net structure is closely interlocked, the whole net move up and down reacting to jumping of children. Net connection to center mat is designed tunnel type for safety purpose.

Tower Net

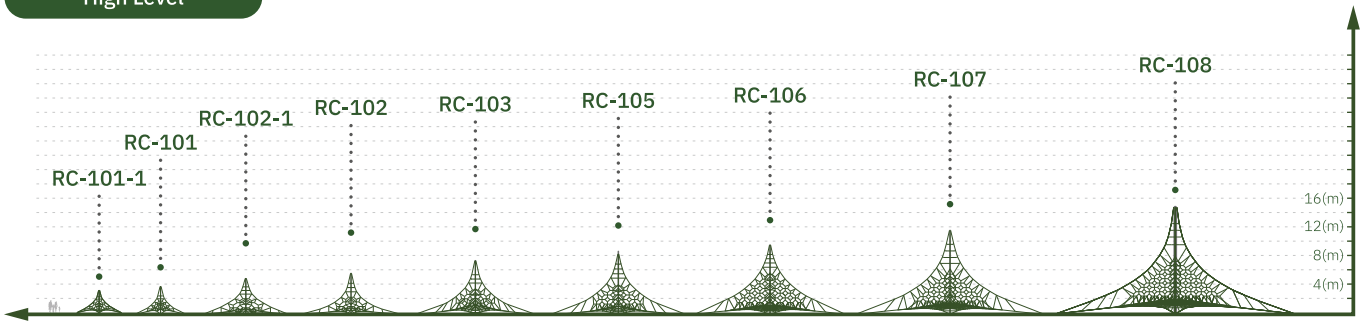

RC-101-1

RC-105

Tower net is a pyramid-style climbing structure made of steel-loaded polymide cable with UV guard. Ropecamp uses the highest steel content in the industry, including a steel-wire core in our edge ropes, to ensure long life of the equipment and maximum safety for children. These games help bring movement, balance, exercise and fun back into the playground.
